

Ian Davis

Elkton, MD | 443-406-5322 | iandavis1504@gmail.com | LinkedIn | github.com/B0OGI3

Full-stack software engineer with 2+ years of production experience shipping real systems — from inventory management platforms to developer tooling. Proficient in React, Node.js, PostgreSQL, and Docker. Seeking a Software Engineering role where I can keep building things that matter.

WORK EXPERIENCE

Software Engineer / CAD Designer Delivered Engineering Solutions Elkton, MD | May 2025 – Present

- Administered PostgreSQL database for a custom Bill of Materials and Inventory Management system, ensuring seamless data accessibility and reliability
- Implemented secure data handling procedures, reducing vulnerabilities and strengthening overall security posture
- Integrated role-based access control, advanced search/filtering, and real-time data updates
- Reduced order tracking time by 35% through full-stack system development
- Designed custom CAD files and drawings for engineering deliverables

Lab Assistant Salisbury University Salisbury, MD | Aug 2023 – Dec 2025

- Provided Java programming support to 30+ students per semester
- Diagnosed and resolved runtime and logical errors, improving lab assignment grades by 25%
- Delivered mentorship and technical documentation to reinforce core software engineering principles

PROJECTS

GitHub Developer Dashboard Apr 2026 – Present

Built a React + Vite dashboard that visualizes any GitHub user's contribution history, language breakdown, and top repositories via the GitHub REST and GraphQL APIs. Features a contribution heatmap, language donut chart (Recharts), loading skeletons, dark/light mode, and full mobile responsiveness.

Live: dev-dashboard-eight-liart.vercel.app | github.com/B0OGI3/dev-dashboard

MoveSync Apr 2026 – Present

Built a real-time multiplayer chess app with spectator mode, live emoji reactions, and in-game chat. Features server-side move validation via chess.js, role-colored nicknames, captured pieces display, rematch with color swap, and floating reaction animations. Game state managed server-side with room-based architecture — no database required.

DES-BOMS (Batch Order Management System) Jan 2025 – Present

Developed a full-stack batch order management system tailored to a manufacturing workflow (orders, batches, workstations, inspections). Built on PostgreSQL with Prisma ORM, QuickBooks OAuth integration, and Docker Compose for containerized local/dev setup.

github.com/B0OGI3/des-boms

Firestore Admin Panel Jan 2024 – Jan 2025

Built a modern admin panel for Firestore databases with authentication and a configurable management UI. Features dynamic collection/field-driven UI generation, CSV import/export, bulk operations, and filtering/search.

github.com/B0OGI3/firestore-admin-panel

SKILLS

Languages: Python, JavaScript, C/C++, SQL (PostgreSQL), HTML/CSS

Frameworks & Libraries: React, Vite, Node.js, Express, Socket.io, Prisma, Recharts, Axios

Tools & Platforms: Docker, Git, GitHub, Vercel, PostgreSQL, Firestore, QuickBooks API, OAuth 2.0

Concepts: REST APIs, GraphQL, RBAC, Data Structures & Algorithms, OOP, Database Systems, Operating Systems

EDUCATION

B.S. Computer Science Salisbury University Salisbury, MD | Aug 2022 – Dec 2025

Relevant Coursework: Data Structures & Algorithms, Operating Systems, Database Systems, OOP, Computer Networks, Software Engineering
